Narrative Description:

What The Film is a cross-platform (web & iOS) movie streaming service for low budget and student films.

User Stories:

1. MUST - As a user, I want to be able to click on a movie cover so that I can watch a film.
2. MUST - As a user, I want to be able to use a grid of movie covers so that I can find the film I want.
3. MUST - As a user, I want to be able to browse movies by category so that I can find the film that I want.
4. SHOULD - As a user, I want to be able to search through the catalog of films so that I can find the specific film I'm looking for.
5. SHOULD - As a user, I want the films to be organized in a neat and aesthetically pleasing fashion so that I trust and like the website.
6. COULD - As a user, I want to be able to securely maintain and be able to login to a personal account so that I can see my viewing history.
7. COULD - As a user, I want to be able to read and write reviews so that I can discern which movies are worthwhile.
8. COULD - As a user, I want to be able to return to a movie at the place where I left off so that I don't have to seek forward each time.

Story Points:

One Story Point: Similar to implementing an html table on a web page and styling it.

User Story	Story Points
Sprint 1	
Watch Film	20
Film Grid	5
Sprint 2	
Categories	8
Search	15
Aesthetics	15
Sprint 3	
Login/History	10
Reviews	15
Save Place	10
