Website:
Search not implemented
Time is shown in seconds
Review section still shows temporary code.
Sometimes the horizontally scrolling lists get stuck.

App:
No known bugs

Suggested Test Cases:

1. On both web & iOS: Think of a genre you like, find that genre, and pick a movie from the list. Then play the movie.
2. On iOS: Pull down to activate search and type in a query of at least three characters. See the results change in real time as new characters are typed. Tap on one of them to be taken to its screen and play the movie.
